Summary

Analytical and detail-oriented Full Stack web developer passionate about MERN Stack technologies. Capable of writing production-ready code using ReactJS, Redux, and CSS on the frontend, NodeJS, and Express on the backend, and MongoDB as the database to build single-page web applications.

Intensely interested in working for a product-based company and provide user-centric solutions.

Projects

Youtube Clone

Individual Project

Key features:

- Login with Google via Firebase Authentication System.
- Search any video or channel and play any video of your choice.
- Relevant videos are displayed beside the watch screen along with a comment section with live comments.
- Seeing the channels that a user is subscribed to.
- Cross-platform responsiveness.

Tech Stack:

ReactJS with redux. | SCSS | Youtube-v3-API.

GeekBuying Clone

Collaborative Project

Key features:

- This website allows users to create their own account and sign in using the required email id and password.
- The products-list page provides a list of products belonging to a certain category. Furthermore, the products can be filtered and sorted according to user preferences.
- After the user ends up choosing all the desired products to purchase, the user gets directed to the cart page where there is a list of all the products the user would purchase and in what quantity. The total price gets displayed in the UI underneath all the products. From there, the user can proceed to payment.

Tech Stack:

HTML | CSS | JavaScript.

Work Experience

Workforce Manager - Sreedhar Optics

Oct 2017 – Dec 2021

- Managed a workforce of over 20 members.
- Kept track of orders for delivery and made sure that top-quality lenses were delivered by the workers for a particular order.
